

Project Summary

The City of Hutchinson entered into a partnership with Ameresco to lower energy and operating costs. Ameresco designed and implemented a program that helps the City achieve their energy and environmental goals. Ameresco updated lighting systems throughout 16 of the City's buildings. In addition to saving energy, many buildings now have improved lighting and light levels. Numerous old and outdated lighting fixtures were replaced with more aesthetically pleasing fixtures.

In addition, variable speed motors controls were implemented at the City's Wastewater Treatment Facility. These new motor controls were integrated with the existing SCADA control system for fully automated monitoring and adjustment based on current flow and load.

Accolades

"The City of Hutchinson is constantly striving to maintain its assets at a high level stressing operational efficiency and functionality. Through developing a relationship with AMERESCO some of these goals have been achieved throughout the City. AMERESCO's professionalism and vast knowledge of project design, project implementation, and oversight has paid dividends for the City of Hutchinson. The City of Hutchinson looks forward to exploring future energy project partnerships with AMERESCO. I recommend AMERESCO for your energy related project needs."

- Jeremy Carter, City Administrator

Accolades

"The City of Hutchinson has very diverse operations with unique needs. The working partnership developed with AMERESCO enabled the City to address some of these needs by implementing a project that spanned all City departments. AMERESCO's comprehensive assessment of all City facilities provided us the tools to identify affordable and cost effective projects throughout our operations. Their staff were very knowledgeable, professional, and responsive to our requests. I look forward to continuing our partnership and recommend AMERESCO for your energy related project needs."

- John Paulson, Environmental Specialist
