

City of Wyoming, MN

Published by Brody Tucker · 2m · 🌐

The City of Wyoming is a Minnesota GreenStep City. As part of the GreenStep program the city wants to take a moment to recognize the significant sustainability efforts Wyoming's own Rosenbauer has taken. In 2022, they built an electric fire truck that the Los Angeles Fire Department commissioned as the nation's first electric fire engine. Earlier this year, they were recognized by the State of Minnesota for the first Minnesota-made electric fire truck. Rosenbauer hopes to build more of these trucks in Minnesota going forward.
