

# Burnsville Parks, Recreation and Facilities Frameworks Plan

The City of Burnsville has reviewed and evaluated its parks and amenities over the last three years.

This process considered location, relevance of each park feature, opportunities to reduce maintenance, improvement of the natural landscape and current trends. The Framework Plan was developed to guide changes in the Parks system to better serve future generations. This plan is expected to reduce maintenance costs, eliminate the replacement of less-used amenities, and improve the health of our parks natural resources.

This plan is regularly reviewed. Share your questions or feedback at [burnsvillemn.gov/frameworks](https://burnsvillemn.gov/frameworks).

Burnsville Parks	Completed Projects	2022 Proposed Work	Future
