

## **ARTICLE XIII. VILLAGE MIXED USE DISTRICT**

### **§ 154.500 PURPOSE AND DISTRICT DESCRIPTION.**

The purpose of the VMX district is to provide an area for compact, mixed use development made mutually compatible through a combination of careful planning and urban design and coordinated public and private investment. This district is intended to continue the traditional mixed use development that has occurred in the Village area by allowing retail, service, office, civic and public uses as well as residential units. The mixture of land uses within the district is essential to establishing the level of vitality and intensity needed to support retail and service uses. The placement of building edges and treatment of building, parking, landscaping, and pedestrian spaces is essential to creating the pedestrian friendly environment envisioned for the VMX district. The standards in this chapter are intended to implement and effectuate the principles and relationships established in the Village Master Plan, which will be carried out through specific standards related to site planning, signage, architecture, building materials, and landscaping. Renovation and infill of traditional storefront-type buildings is encouraged, and parking standards may be waived to recognize the availability of on-street and shared parking facilities.
